<td>A few hundred years ago only people on the British Isles spoke English. After the Age of Exploration, English ships sailed over to faraway parts of the world and have founded colonies on all continents. English became the mother tongue in the United States, Australia and New Zealand. In many other countries this English was spoken in schools, in government and trade products. Today, it is still used for as a second language in India, Pakistan and other countries. In the course of time, while many different dialects of the English mother language developed. British and American English, for example, differ not only in pronunciation, but also in such vocabulary and grammar. There are even many reasons why English is widely used around the world. It has become the dominant language in science and then the main language of international communication and the Internet. This is why English language has become the most important foreign language in child education in many countries.</td>
