

Complete the sentences using a word from the box for each blank.

**ACID - CARBON - CLIMATE - CONSERVATION - ENDANGERED - FERTILIZERS - FOOTPRINT - FOSSIL - GREENHOUSE - HYBRID - ICECAPS - LOGGING - OIL - RENEWABLE - RESERVES - SOLAR - SUSTAINABLE - WARMING - WASTE - WIND**

1. The organisation focuses on animal \_\_\_\_\_ and the protection of endangered wildlife.
2. Melting \_\_\_\_\_ have increased in Arctic and Antarctic waters.
3. Global \_\_\_\_\_ refers to an increase in the world's temperature caused by increased amounts of carbon dioxide.
4. A \_\_\_\_\_ car has both a diesel engine and an electric motor.
5. The largest source of \_\_\_\_\_ emissions comes from the release of carbon dioxide into the atmosphere.
6. Chemical \_\_\_\_\_ are substances that contain nutrients for the growth of plants.
7. The disaster produced a three-square mile \_\_\_\_\_ slick off the coast of Norway.
8. \_\_\_\_\_ change has led to the rise of sea levels around the world.
9. The report said that \_\_\_\_\_ rain is the main factor causing the death of many trees.
10. A new \_\_\_\_\_ farm was set up to produce electricity for the densely populated region.
11. \_\_\_\_\_ power is the conversion of sunlight into electricity.
12. We can reduce our carbon \_\_\_\_\_ by buying home-grown food.
13. Industrial \_\_\_\_\_ is often buried in the ground or dumped in landfills.
14. The members of the committee agreed that an increase in \_\_\_\_\_ energy must be achieved at all costs.
15. Tigers, snow leopards and sea turtles are among the most \_\_\_\_\_ species in the world.
16. Illegal \_\_\_\_\_ has led to the destructions of large areas of rainforest in the Amazon region.
17. The report says that oil \_\_\_\_\_ will last for at least another 50 years.
18. \_\_\_\_\_ gases only make up a small part of the earth's atmosphere.
19. The most important \_\_\_\_\_ fuels are coal, oil and natural gas.
20. \_\_\_\_\_ development refers to using resources in a way that will leave enough for future generations.

## KEY

1. The organisation focuses on animal **conservation** and the protection of endangered wildlife.
2. Melting **icecaps** have increased in Arctic and Antarctic waters.
3. Global **warming** refers to an increase in the world's temperature caused by increased amounts of carbon dioxide.
4. A **hybrid** car has both a diesel engine and an electric motor.
5. The largest source of **carbon** emissions comes from the release of carbon dioxide into the atmosphere.
6. Chemical **fertilizers** are substances that contain nutrients for the growth of plants.
7. The disaster produced a three-square mile **oil** slick off the coast of Norway.
8. **Climate** change has led to the rise of sea levels around the world.
9. The report said that **acid** rain is the main factor causing the death of many trees.
10. A new **wind** farm was set up to produce electricity for the densely populated region.
11. **Solar** power is the conversion of sunlight into electricity.
12. We can reduce our carbon **footprint** by buying home-grown food.
13. Industrial **waste** is often buried in the ground or dumped in landfills.
14. The members of the committee agreed that an increase in **renewable** energy must be achieved at all costs.
15. Tigers, snow leopards and sea turtles are among the most **endangered** species in the world.
16. Illegal **logging** has led to the destructions of large areas of rainforest in the Amazon region.
17. The report says that oil **reserves** will last for at least another 50 years.
18. **Greenhouse** gases only make up a small part of the earth's atmosphere.
19. The most important **fossil** fuels are coal, oil and natural gas.
20. **Sustainable** development refers to using resources in a way that will leave enough for future generations.
